

A quick, honest estimate — not a sales pitch. Fill this in together and see what the number actually looks like for your business.

1 About how many calls do you think you miss in a typical week?

_____ missed calls / week

2 What's an average job or ticket worth to you?

\$ _____ per job

3 Realistically, what share of those calls would've become paying customers?

_____ % (30% is a reasonable starting estimate)

THE MATH

_____ missed calls/wk **×** _____ % conversion **=** _____ lost customers/wk

_____ lost customers/wk **×** \$ _____ avg ticket **=** \$ _____ lost / week

\$ _____ estimated lost revenue / month (weekly figure × 4.3)

"Would recovering even part of that make a meaningful difference?"
